

XLH™ Hybrid Electric Upfit

New to the XL Fleet lineup is the electrified Ford F-550 platform. Everything work truck drivers love about the F-550, from payload and reliability to the iconic Ford brand, is now available with a hybrid electric upfit solution that significantly improves fuel efficiency and decreases CO2 emissions, while also providing better acceleration and regenerative braking.

This heavy-duty system is ideal for fleet applications involving municipal transportation, utilities, hauling construction equipment and providing a variety of services. And now with a high efficiency lithium-ion battery, there's much more to gain from the F-550, as vehicles equipped with XL Fleet's hybrid electric drive system have been proven to significantly improve fuel economy while reducing greenhouse gas emissions.

Proven Vehicles from Trusted OEMs

XL-equipped vehicles drive just like conventional trucks in your fleet. Drivers can continue operating the same vehicle they're accustomed to, now electrified with an XLH hybrid system.

Savings and Sustainability

Our XLH hybrid system delivers up to 25% increase in miles per gallon* and significantly decreases CO2 emissions.

Fleet-Ready™

XL hybrid systems install quickly and easily onto factory vehicles, so they're ready to work in your existing fleet with:

- no driver training
- no special fueling infrastructure
- no range concerns

The manufacturer powertrain and warranty remain completely intact, and our hybrid component warranty is 3 years / 75,000 miles.

*Actual MPG may vary based on driver behavior, drive cycle and other factors.

XL Hybrid Ford F-550 [†]	
Engine (gasoline)	7.3L
Wheelbase	All
Cab	All
Drive	4x2, 4x4

Installation available for new vehicles and retrofits. Configuration and model year availability may vary. Contact your XL Fleet sales manager for details.

[†]Certain vehicle model year options may limit compatibility.

XLH™ Hybrid Electric Drive System

Proven Performance Over 170 Million Miles

The XLH hybrid electric drive system has provided more than 170 million reliable, sustainable miles across a wide range of fleet vehicles. The hybrid system saves fuel through regenerative braking, a process by which the electric motor helps slow the vehicle during braking to charge the hybrid battery. As the driver accelerates, the hybrid battery releases the stored energy to the electric motor, which helps to propel the vehicle — reducing fuel consumption and lowering emissions.

XLH™ Hybrid System	Specifications
MPG Improvement*	Up to 25%
Battery	High Efficiency Lithium Ion
System Weight	385 lbs
System Torque (Peak)	220 lb-ft (Added at Driveline)
Component Warranty	3-Year / 75,000 Miles

*Actual MPG may vary based on driver behavior, drive cycle and other factors.

Intelligent Decisions

Our proprietary, cloud-based, vehicle connectivity platform provides actionable intelligence, including speed, idling, vehicle drive cycle and CO2 emissions reduction.

XL Fleet is a leading provider of a full suite of commercial and municipal fleet electrification solutions.
