

## XLH™ Hybrid Electric Upfit

XL Fleet continues to revolutionize the work truck industry with our first-ever hybrid electric upfit for the RAM 2500 / 3500. Known for legendary heavy-duty performance and superior hauling power, these world-class RAM pickups are now available to be upfitted with the innovative XLH hybrid electric drive system. The result is a seamless way for fleets to improve fuel economy and reduce CO2 emissions without disrupting operations or vehicle performance. It's the ideal solution for fleets looking to electrify their work trucks and meet sustainability requirements right away, without the high cost, limited availability and infrastructure requirements of an all-electric solution.

### Proven Performance, Electrified

Like all XL Fleet equipped vehicles, the XL Hybrid RAM 2500 / 3500 work trucks perform just like conventional fleet vehicles, while providing an immediate path to sustainability for fleets looking to meet mandates and lower their carbon footprint.

### Same Vehicles You Know and Trust

XL-equipped vehicles drive just like conventional trucks in your fleet. Drivers can continue operating the same

vehicle they're accustomed to, now with an XLH hybrid electric system.

### Savings and Sustainability

Our XLH hybrid system delivers up to a 25% increase in miles per gallon\* and significantly decreases CO2 emissions.

### Fleet-Ready™

XL hybrid systems install quickly and easily onto factory vehicles, so they're ready to work within your existing fleet with:

- no driver training
- no special fueling infrastructure
- no range concerns

The manufacturer powertrain and warranty remain completely intact, and our hybrid component warranty is 3 years / 75,000 miles.

\*Actual MPG may vary based on driver behavior, drive cycle and other factors.

#### XL Hybrid RAM 2500 / 3500

Engine (gasoline)	6.4L V8
Wheelbase	140", 149", 160", 169"
Cab	Regular / Crew / Mega
Drive	4x2, 4x4

\*Available for the 2WD configuration. Installation available for new vehicles and retrofits beginning with model year 2019 and up.

## XLH™ Hybrid Electric Drive System

Proven Performance Over 150 Million Miles

The XLH hybrid electric drive system has provided more than 150 million reliable, sustainable miles across a wide range of fleet vehicles. The hybrid system saves fuel through regenerative braking, a process by which the electric motor helps slow the vehicle during braking to charge the hybrid battery. As the driver accelerates, the hybrid battery releases the stored energy to the electric motor, which helps to propel the vehicle – reducing fuel consumption and lowering emissions.

XLH™ Hybrid System	Specifications
MPG Improvement*	Up to 25%
System Voltage	259V
Battery	High Efficiency Lithium Ion
System Weight	350 lbs
System Torque (Peak)	220 lb-ft (Added at Driveline)
Component Warranty	3-Year / 75,000 Miles

\*Actual MPG may vary based on driver behavior, drive cycle and other factors.

**XLLink™**  
**Intelligent Decisions**  
 Our proprietary, cloud-based, vehicle connectivity platform provides actionable intelligence, including speed, idling, vehicle drive cycle and CO2 emissions reduction.
